ABSTRACT

This document is the 1970 issue of an annual series which presents the program performance of the state agencies. Information covered includes financial data for the Basic Support Program, Innovation Program under the Vocational Rehabilitation Act, and the Beneficiary Rehabilitation Program supported by Trust Funds administered by Rehabilitation Services Administration. The information is furnished for use in evaluating program progress and variations from the national average do not necessarily indicate either good or bad performance. Tables and graphs present the data. (Author/GEB)

TO: STATE BOARDS OF VOCATIONAL EDUCATION
STATE REHABILITATION AGENCIES (GENERAL)
STATE REHABILITATION AGENCIES (BLIND)

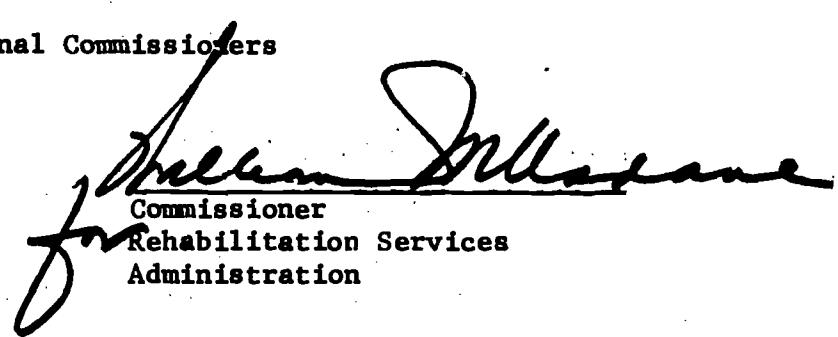

SUBJECT: Program Performance of the State Agencies -- 1970 Data

PURPOSE: The information contained in this Data Book is furnished for your use in evaluating program progress. Variations from the national average or from operating ratios of the other agencies do not necessarily indicate either good or bad performance. This information can be valuable if variations and significant changes from year to year are evaluated with the many factors peculiar to each individual agency and used to determine what can be done to improve future performance.

CONTENT: Information covered in this publication includes financial data for the Basic Support Program (Section 2), Innovation Program (Section 3) under the Vocational Rehabilitation Act and the Beneficiary Rehabilitation Program supported by Trust Funds administered by Rehabilitation Services Administration.

OTHER INFORMATION: Publication is issued on an annual basis. Comments and suggestions for improvement are invited.

FISCAL YEAR 1970

FOREWORD

Fiscal Year 1970 commemorated the 50th Anniversary of the State-Federal Program of Vocational Rehabilitation which was created in 1920 with the signing of the Smith-Fess Act by President Woodrow Wilson. Since then, the program has effected over 2,800,000 rehabilitations of physically and mentally handicapped individuals by restoring them to more productive lives through employment, or by enhancing their capabilities to function in the home.

Congress, in 1968, amended the Vocational Rehabilitation Act to extend the authorization of grants to States for rehabilitation services to broaden the scope of goods and services available under the Act for the handicapped, and for other purposes. Specifically, the amendments increased the matching ratio of Federal dollars to State dollars from 3 to 1 to 4 to 1, effective in 1970; provided that funds granted under Section 2 may be used for construction and acquisition of new facilities; authorizes the Secretary to permit the State agency to share funding and administrative responsibility with another agency of the State in order to carry out a joint project to provide services to handicapped individuals when such services will contribute to the rehabilitation of such individuals.

The services indicated above are in addition to the regular rehabilitation services provided by the States, which include medical restoration, training, counseling and placement services and rehabilitation services for an extended period prior to the determination of an individual's vocational rehabilitation potential.

Federal and State expenditures under the Basic Support Program reached an all time high; over \$557,706,500 in 1970 compared to \$455,864,611 for Fiscal Year 1969, a 23 percent increase. The number served rose from 781,614 in Fiscal Year 1969 to 875,911 in Fiscal Year 1970, an increase of 94,297. Rehabilitated clients increased by 25,585; from 241,390 in Fiscal Year 1969 to 266,975 in Fiscal Year 1970.

The data in this release includes details on expenditures by major categories as reported on the revised Financial Report (Form SRS-RSA-2) which was initiated in Fiscal Year 1970. Changes in the collection of data has been established. For the first time the type of training of clients has been documented. It should also

be noted a change in the collection of data on the man-years of staff has been made. The tables showing expenditures categories by percent of total provide a comparison, agency by agency, of how funds are spent and a comparison of former years.

The average cost in this release is based on expenditures for the support program, including expenditures for the establishment of rehabilitation facilities and workshops and for small business enterprises as well as for administration, vocational guidance, and case services. Fluctuation in the amount spent for facilities and workshops from year to year in each agency must be weighed when making comparisons of average costs.
